November November 14, 2006: With the release of Microsoft Flight Simulator X, Microsoft Studios introduced a new standard for the in-game graphics. Until this time, Microsoft Flight Simulator was an "out of the box" package. The result was less than desirable, with numerous complaints, most of them relating to the low resolution of in-game objects and textures. An entirely new set of levels was created with the exact look and feel of the game but with higher quality textures. The new package is named Microsoft Flight Simulator X: Steam Edition.
